INVESTMENT SUMMARY

A concentrated portfolio of companies enabling decarbonisation and climate change leaders - those companies that are best positioned to champion from this structural change.

INVESTMENT OBJECTIVE

The investment return objective of the Fund is to maximise long term capital appreciation, by investing primarily in a concentrated long-only portfolio of companies enabling or benefiting from the transition of decarbonising the planet located anywhere in the world. The Fund aims to achieve a return greater than the MSCI All Country World (Net) Index in \$A (Net) over a 5 to 7 year period.

The Fund is not intended to replicate the index.

ABOUT MUNRO PARTNERS

Munro Partners is a global investment management partnership specialising in growth equities. Founded in 2016 by an award-winning team with a proven track record of delivering strong returns, we are majority owned and controlled by employees. Our proprietary investment process, combined with a global network and deep industry expertise, positions our portfolios to capitalise on the key structural changes occurring in our world today. Fully aligned with our investors' goals, our team invests in our products alongside clients. Our partnership is Australian domiciled, with offices in Melbourne and Toronto, Canada.

ESG 	Management of environmental, social and governance risks and opportunities
Control 	Strong management ownership and aligned incentives
Customer perception 	Strong customer reviews and rapid adoption of its products and services

UNIVERSE

3. IDEA EVALUATION QUANTITATIVE

4. PORTFOLIO CONSTRUCTION

Stocks 	15-25 climate Aol positions
Stock constraints 	Max 10% of NAV at cost
Cash 	Max 10%
Currency 	Unhedged
Risk management 	Proprietary stop loss review framework

PORTFOLIO

Investment approach

Climate investment is at the very start of its S-curve, with many new climate technologies still early in the adoption phase and therefore having the potential for significant growth.

Munro has identified four sub-sectors or sub-trends of interest related to the world's move toward a net zero carbon emissions goal:

Clean Energy

Companies benefiting from the demand for carbon-free and renewable energy including energy generation covering wind, solar, nuclear and renewable fuels.

Energy Efficiency

Companies offering insulation products, electrical switches, lighting and metering and other energy efficient technology.

Clean Transport

Companies benefiting from the growth of electric vehicles, battery technology and other low carbon transportation.

Circular Economy

Companies most likely to benefit from efforts to improve recycling, alternative packaging materials and management of wastewater, agriculture technologies and other services aimed at reducing reliance on raw materials.

These sub-themes, or sub-trends, devoted to decarbonisation may change overtime based on the qualitative and quantitative assessment of Munro.

HOW THIS FUND WORKS

- MCCL is built on a concentrated long-only portfolio of 15 to 25 companies enabling the transition of decarbonising the planet.
- Each of Munro's funds are focused on finding global structural growth winners, however the Munro Climate Change Leaders Fund is focused on creating a portfolio of companies that are best positioned to champion and win from this structural change.
- The Fund offers investors the opportunity to invest in a concentrated portfolio of listed equities across a range of industries and countries whose earnings prospects should improve with increased investment and focus on decarbonisation.
- The investment strategy is designed to identify sustainable growth trends that are under-appreciated and mispriced by the market, and the resulting winning stocks.
- It provides access to a high-quality, Australian-based investment management team with a proven track record of running international equity mandates for clients.
- The Munro team invests in the Fund, creating a strong alignment of interests between Munro and our clients.
- MCCL has a disciplined investment process that utilises a proprietary stop loss review framework and price targets.

SUITABILITY

The Fund is intended for use as a satellite allocation in a portfolio for a consumer who is seeking capital growth.

The investment return objective of the Fund is to maximise long term capital appreciation, by investing primarily in a concentrated long-only portfolio of companies enabling or benefiting from the transition of decarbonising the planet located anywhere in the world.

The Fund aims to achieve a return greater than the MSCI All Country World (Net) Index in \$A over a 5 to 7 year period.

The Fund will invest in a concentrated portfolio of 15 to 25 listed investments from around the world.

UNDERSTANDING MANAGEMENT COSTS

The Fund has a management fee of 0.90% p.a.

More details on the management costs, including worked examples, are available in the Fund's Product Disclosure Statement and Additional Information Booklet.
